REVA SAXENA

Data Engineer | BCA Student — Python, SQL, ETL & Data Pipelines

Jaipur, Rajasthan | 6378863351 | revasaxena90@gmail.com | LinkedIn | Portfolio

PROFILE

BCA student with four internships across data analytics, AI/BI, and Python development. Hands-on experience querying multi-table data with SQL, automating data collection and validation, transforming datasets, and building analytics workflows and dashboards. Strong foundation in Python, data quality, ETL concepts, and turning raw data into reliable, analysis-ready datasets.

CORE SKILLS

- Programming & Querying: Python, SQL, Java, C, JavaScript, R, Scala
- Data Engineering: ETL/ELT Concepts, Data Pipelines, Data Extraction, Data Transformation, Data Validation, Data Quality Checks, Data Cleaning, Structured Data, Anomaly Detection
- Databases & Analytics: SQL Joins, Multi-table Queries, Pandas, NumPy, EDA, Statistical Analysis, Power BI, Tableau, Plotly, Excel (PivotTables, VLOOKUP, Macros)
- Big Data & Cloud: Apache Spark, Big Data Fundamentals, Oracle Cloud Infrastructure (OCI)
- Automation & ML: Web Scraping, Workflow Automation, Scikit-learn, Predictive Modeling, Machine Learning Fundamentals
- Development: Flask, HTML, CSS, React
- Tools & Platforms: Git, GitHub, Docker, Postman, Jupyter Notebook, Anaconda, VS Code
- Professional: Problem Solving, Data Documentation, Stakeholder Communication, Agile/Scrum Basics

EXPERIENCE

AI Strategy & BI Intern | CSRBOX (IBM SkillsBuild x AICTE) *Mar 2026 — Apr 2026*

- Applied BI and AI frameworks to 3 real-world business case studies, analyzing business problems and presenting data-informed recommendations to a mentor panel.

Website Developer Intern | Mridul and Rohan *Sept 2025 — Oct 2025*

- Converted 10+ UI design mockups into responsive, functional website pages, improving cross-browser compatibility and cutting page-load time by roughly 20% through CSS optimization and DevTools/DOM debugging.

Data Analytics Intern | Algonive *Jun 2025 — Jul 2025*

- Built predictive models and anomaly-detection workflows on a 25,000+ row transactional dataset, improving detection accuracy by roughly 18% over baseline rule-based checks.
- Built Python, Plotly, and SQL dashboards to track 10+ business metrics, translating queried data into timely, actionable stakeholder insights.
- Automated data validation and transformation steps in an analytics pipeline, reducing manual data-preparation time by an estimated 30–35% and lowering downstream data-quality errors.
- Wrote SQL queries and joins across multiple tables to deliver data for 15+ ad-hoc analysis requests.

Python Developer Intern | Cognifyz Technologies *May 2025 — Jun 2025*

- Developed 5+ Python tools and mini-applications for task automation, data processing, and basic visualization.
- Automated web scraping to extract and structure 1,000+ records, reducing manual collection time by an estimated 70% and adding input-validation and debugging checks.

PROJECTS

Underground One | *React, TypeScript, Leaflet, Recharts, Tailwind CSS* Live Demo

- Built a city-aware React/TypeScript GIS platform with typed, deterministic datasets for 15 Rajasthan cities; implemented date-window conflict detection, weighted risk scoring, cost/disruption estimates, and Recharts analytics.

Insiora | *Python, SQL Concepts, TypeScript, React, PapaParse* Live Demo

- Built a data analytics platform that evaluates data quality, identifies KPIs, and generates statistical summaries and visualizations from uploaded data.

Password Strength Analyzer | *HTML, CSS, JavaScript* Live Demo

- Implemented a rule-based password evaluator with real-time strength feedback and vulnerability checks.

EDUCATION

IIS (Deemed to be University), Jaipur

- Bachelor of Computer Applications (BCA) — Current CGPA: 9.7/10 | Expected May 2027
- Advanced Diploma in Data Analytics — CGPA: 9.8/10 | May 2026
- Diploma in Data Analytics — CGPA: 10/10 | May 2025

CERTIFICATIONS & TRAINING

- J.P. Morgan — Quantitative Research Job Simulation (Forage)
- Accenture North America — Data Analytics & Visualization Job Simulation (Forage)
- IBM — Data Analysis Using Python (Tableau, Excel & Data Visualization)
- Oracle Cloud Infrastructure 2025 Certified Developer Professional
